

DURVAC™ Bovine Biologicals

SUPERIOR
PROTECTION
UNSURPASSED
VALUE

Unsurpassed Value. Superior Protection.

DURVAC™ cattle vaccines offer a wide choice in protection options to keep your cattle herd healthy and productive. DURVAC™ bacterins and serums provide protection against the most prevalent diseases in cattle, from newborns to breeding animals. Trust Durvet's line of cattle biologicals for unsurpassed value and superior protection in your cattle herd.

DURVAC™ LEPTO 5

For use as an aid in the prevention of Leptospirosis caused by *Leptospira Canicola*-*Grippotyphosa*-*Hardjo*-*Icterohaemorrhagiae*-*Pomona* Bacterin.

10 dose (20 mL) vials, UPC# 7-45801-11852-2
50 dose (100 mL) vials, UPC# 7-45801-11854-6

BACTERINS AND SERUMS

DURVAC™ MULTI SERUM

For use as an aid in the prevention and treatment of enteric and respiratory conditions caused by the micro-organisms *Arcanobacterium Pyogenes-Escherichia Coli-Mannheim Haemolytica-Pasteurella Multocida-Salmonella Typhimurium Antibody*.

250 mL vials, UPC# 7-45801-43553-7

DURVAC™ PAST HM

For use in healthy cattle as an aid in the prevention of Pasteurellosis caused by the micro-organisms *Mannheimia Haemolytica-Pasteurella Multocida Bacterin*.

10 dose (20 mL) vials, UPC# 7-45801-40652-0

50 dose (100 mL) vials, UPC# 7-45801-40654-4

DURVAC™ VIBRIO L5

For use in healthy cattle as an aid in the prevention of infertility, delayed conception, abortions, and losses from diseases caused by the micro-organisms *Campylobacter Fetus-Leptospira Canicola-Grippotyphosa-Hardjo-Icterohaemorrhagiae-Pomona Bacterin*.

10 dose (20 mL) vials, UPC# 7-45801-11572-9

50 dose (100 mL) vials, UPC# 7-45801-11574-3

DURVAC™ Vaccination Guide

COMMON NAME	DISEASE	VACCINATION RECOMMENDED	PRODUCTS AVAILABLE FROM DURVET	Novartis	Merck
Blackleg	Clostridial Disease (Commonly sold in 7,8 or 9 way combinations)	Annually	X	Clostri Shield® 7	Stieguard® MLG Vision® 7 Covexin® 8 Cavalry® 9
*IBR, BVD, PI3, BRSV	Respiratory Disease Viral causes	Annually	X	Vira Shield® 6	*Vista® 5 SQ

Pasteurella, BRD	Pasteurellosis	2 weeks prior to feedyard	DURVAC™ Past HM	Nuplura® PH	Once PMH®

REPLACEMENT HEIFERS, ADULT COWS, BULLS

CALVES

STOCKERS / FEEDERS

Vaccination programs should always be customized for your operation. Items to consider in customizing a vaccination program to your operation include geographic region, type of cattle operation, frequency of introducing new stock, and export or interstate shipping requirements. Preventing diseases with a herd health management plan saves time and money. The cost of an annual vaccination program per cow/calf unit ranges from \$4 to \$12. Experiencing a health disaster certainly drives home the point that “an ounce of protection is worth a pound of cure”.

* Do not use Modified Live vaccines in pregnant cows or calves nursing pregnant cows. Substitute an inactivated respiratory vaccine in this situation.

IBR - Rednose-infectious Bovine Rhinotracheitis
BVD - Bovine Virus Diarrhea
PI3 - Parainfluenza
BRSV - Bovine Respiratory Syncytial Virus
BRD - Bovine Respiratory Disease
