DuraGastric EQ GEL

For optimized gut health

Product Overview

DuraGastric EQ Gel: Optimize Equine Digestive Health

DuraGastric EQ Gel is the solution to elevate your horse's digestive health. Whether you own performance and racehorses or care for foals, maintaining a healthy digestive system is paramount. DuraGastric EQ Gel is thoughtfully crafted to meet these unique needs, ensuring your equine champions stay at their best.

The science behind DuraGastric EQ Gel is rooted in a carefully selected blend of ingredients:

- **Mastic Gum:** With anti-inflammatory properties, mastic gum provides soothing relief to the gastric lining, reducing irritation.
- **FOS Prebiotics:** These prebiotics foster the growth of beneficial gut bacteria, optimizing digestion and nutrient absorption.
- **Soy Lecithin:** Serving as a protective shield, soy lecithin guards the stomach lining against the harsh effects of stomach acid.
- **Probiotic Bacteria:** These friendly microorganisms promote a balanced gut flora, supporting overall digestive function.

This powerful combination supports overall digestive function, reduces gastric irritation, and optimizes nutrient absorption.

The benefits of DuraGastric EQ Gel are tailored to performance and racehorses. It empowers racehorses and performance horses to consistently deliver their best during training and competition. For foals, adding DuraGastric EQ Gel into their early care sets them on the path to being a healthy adult.

Usage is simple, feed 5 mL daily for both adult horses and foals, seamlessly fitting into your equine care routine.

Choose DuraGastric EQ Gel to support your horse's digestive health because **every stride matters.**

Know the Warning Signs:

Owners should watch for subtle indicators like reduced appetite, mild colic, and behavior changes, horses may not display overt symptoms of digestive discomfort.

Up to 60% of performance horses are affected by gastric ulcers.¹

Prompt diagnosis and treatment are essential to prevent complications like weight loss and diminished performance. Results from clinical studies indicate that a high-quality product containing the key ingredient, mastic gum, has been proven effective in treating horses with severe gastric ulcers.²

DuraGastric EQ Gel is not intended to diagnose, treat, cure, or prevent any disease, and these statements have not been evaluated by the FDA.
