 Manufactured for

**Important:** Follow feeding directions. Every calf is an individual. The directions above are written for a calf that is about 75-100 pounds at birth. Adjust the amounts fed according to the calf's body weight, the environmental conditions and the level of calf disease on your farm. Consult with your veterinarian if you have questions.

Offer fresh water at all times.

Amount of Bovine Globulin Protein Provided	Amount of Dry Calf Replacer Powder	Amount of Warm Maternal Colostrum
100 gm (350 gm)	1 pouch (350 gm)	0
50 gm (175 gm)	½ pouch (175 gm)	1 qt
		1-3 qts

**MIXING DIRECTIONS**  
 Add the dry Dura-Start 100 powder to clean, warm water at 110-120°F and mix thoroughly until completely dissolved. Allow the solution to cool to 90-100°F before feeding. If you are mixing Dura-Start 100 with maternal colostrum, mix the dry powder with water first, then blend the solution into warm colostrum. Feed mixed Dura-Start 100 solution immediately. Do not store reconstituted colostrum replacer.

**Feeding Directions**  
 Feed the entire volume of solution as soon as possible after birth, ideally within 2 hours. Begin feeding calf milk replacer at the next feeding 6-12 hours later.

**CAUTION**  
 Follow label directions. The addition to feed of higher levels of this premix containing selenium is not permitted. Wash hands after feeding/handling animals. Wash feed/water containers after use.

Store dry powder in a tightly closed container in a cool, dry place.

**STORAGE**  
 Dried Bovine Colostrum, Dried Whey Protein Concentrate, Animal Fat (preserved with BHT and BHT), Dried Whey, Coconut Oil (preserved with citric acid), Animal Fat (preserved with BHA, BHT and ethoxyquin), Lecithin, Calcium Carbonate, Dicalcium Phosphate, Calcium Silicate, DL-Methionine, Natural and Artificial Flavor, Choline Chloride, Dried Skimmed Milk, Casein, Ascorbic Acid, Vitamin A Supplement, Vitamin E Supplement, Selenium Yeast, Niacin Supplement, Calcium Pantothenate, Iron Protein, Vitamin D3 Supplement, Riboflavin Supplement, Pyridoxine Hydrochloride, Thiamine Mononitrate, Manganese Protein, Biotin, Folic Acid, Zinc Protein, Vitamin B12 Supplement, Menadione Sodium Bisulfite Complex (Vitamin K), Copper Protein, Ethylenediamine Dihydroiodide, Cobalt Protein.
