

Automatic Bell Drinker

Indications:

Constructed from durable, BPA-free 100% virgin polypropylene, the Durvet Automatic Bell Drinker delivers a continuous supply of fresh water to both chicks and chickens. Its intuitive design is suitable from the chick stage through to adulthood, featuring a ballast bottle that operates independently of the bell to reduce wear on the valve mechanism. Engineered to maintain a constant water level and a dry floor, the sensitive system activates when a bird consumes as little as 1/3 oz of water. The ballast bottle is an optional method, but the system can also be used with gravity-fed reservoir tanks.

Includes:

- Bell Drinker
- Counterweight Tank (1 Liter)
- Hose bag containing:
 - Stop Cock Valve
 - Supply Hose
 - Suspension Rope
 - Valve Assembly
 - Retaining Pin
 - Retaining Pin Collar
 - Inlet Clamp

For Use On:

Poultry

Benefits:

- **BPA Free Construction:** Made from 100% virgin polypropylene to endure the demands of daily use
- **Bell Shaped Design:** Prevents roosting, ensuring cleanliness and efficiency
- **Capacity:** Conveniently waters 16-20 adult birds
- **Low Pressure Valving:** Perfect for pastured poultry flocks, maintaining optimal water flow
- **Compatibility:** Works seamlessly with gravity-fed reservoir tanks
- **Easy Cleaning:** Designed for simple cleaning in the field, ensuring hygiene and ease of use

Packaging:

1 drinker, 6 drinkers/case
