

Activated Charcoal GEL

INDICATIONS:

Activated Charcoal Gel is a ready-to-use oral gel containing Bone Charcoal, Attapulgitic Clay with electrolytes. Intended as an emergency first aid during times of accidental poisoning resulting from insecticides, herbicides, organic chemicals, intestinal bacterial contaminants, or grain overload. Research has shown that activated charcoal is effective in counteracting the effects of certain oral toxins.

APPROVED FOR USE ON:

Dogs and Cats

PRODUCT ADVANTAGES:

- Intended for use as an emergency treatment in case of accidental poisoning
- Convenient tubes ensure proper dosage
- Contains Bone Charcoal and Attapulgitic Clay

FEEDING DIRECTIONS:

For use in dogs and cats. Select the recommended feeding rate in the tubes and feed the animals orally allowing time to swallow.

Dogs & Cats: 1-3 mL per kg (2.2 lb.) body weight. Repeat Activated Charcoal Gel feeding after 1 to 3 hours or as needed. A stomach tube should be used in animals unable to swallow. If conditions do not improve, consult your veterinarian. Depending on the condition of the animal, supportive therapy such as parental fluids and injectable antidotes should be used along with Activated Charcoal Gel for efficient recovery. May not be very effective in the treatment of heavy metal poisoning like lead, arsenic, mercury, etc.
